Image Switcher For Custom Options for Magento 2 Installation Guide

Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.

2. Copy extension zip archive to the Magento root folder.

3. **The next steps should be done using SSH console**. Connect to your hosting server using SSH client and go to the magento root directory.

   ```
   cd ~/public_html
   ```

   The "~/public_html" path is an example of magento root directory, which can be different on your hosting server.

4. Create the **app/code/Orange35/ImageSwitcher** folder and extract archive files there:

   ```
   mkdir -p app/code/Orange35/ImageSwitcher
   unzip orange35-image-switcher.zip -d app/code/Orange35/ImageSwitcher
   ```

5. Install the following module with a workaround for the magento bug #5067.

   ```
   composer require orange35/magento2-custom-option-value-save-handler
   ```

6. Enable the modules:

   ```
   php bin/magento module:enable Orange35_CustomOptionValueSaveHandler
   php bin/magento module:enable Orange35_ImageSwitcher
   ```

7. Run the following commands:

   ```
   php bin/magento setup:upgrade
   php bin/magento setup:di:compile
   ```

8. If your store is in production mode then deploy static content

   ```
   php bin/magento setup:static-content:deploy
   ```

9. Congratulations! You are now ready to use Image Switcher For Custom Options extension.

Usage

1. Go to a product edit page on the admin end

2. Upload a few images. Product should have at least two images.

3. Add at least one customizable option with a few values

4. Save the product and open the product edit form again

5. Open the "Image Switcher Custom Combinations" accordion tab and add multiple combination choosing custom option values and images.

6. Save the product

7. Find the product on the user end.

8. Choose a custom option value configured in step 5 above and you should see the appropriate images.
