

Magento Image Switcher for Custom Options Installation/Configuration Guide

Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.
2. On your back end, go to **System** → **Magento Connect** → **Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under “Direct package file upload” section, browse for extension archive file and hit “Upload”.

The screenshot displays the Magento Connect Manager interface. At the top, there is a navigation bar with 'Extensions' and 'Settings' tabs, and links for 'Return to Admin' and 'Log Out'. Below this, there are sections for 'Settings', 'Install New Extensions', and 'Direct package file upload'. The 'Direct package file upload' section is highlighted with a red border and contains the following steps: 1. Download or build package file. 2. Upload package file. A red arrow points from the text 'Upload package file' to a 'Browse...' button, and another red arrow points from the text 'No file selected.' to an 'Upload' button. Below this section, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button, and a 'Channel: Magento Community Edition' section with a 'Commit Changes' button. At the bottom right, there is a checkbox for 'Clear all sessions after successful install or upgrade:'. The 'Settings' section includes a checkbox for 'Put store on the maintenance mode while installing/upgrading/backup creation' and a 'Create Backup' section with a dropdown menu set to 'Database'.

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Cache Management**.
6. Congratulations! You are now ready to use **Image Switcher for Custom Options**.

Configuration/Usage

Creating product custom options

Before using Image Switcher for Custom Options, you need to make sure product's custom options are actually set. You can add custom options to your product as a part of Magento default functionality:

Go to **Catalog**→**Manage Products**→<Product Name>→**Custom Options** and create custom options as you need:

Choose Store View: Default Values

Green	2.00	Fixed		0
Red	2.00	Fixed		0
Yellow	2.00	Fixed		0

Title *	Input Type *	Is Required	Is Colorpicker	Sort Order
Lenses	Drop-down	Yes	No	2

Title *	Price	Price Type	SKU	Sort Order
Black	0.00	Fixed		0
Blue	3.00	Fixed		0
Green	3.00	Fixed		0
Red	3.00	Fixed		0
Yellow	3.00	Fixed		0

Uploading images for custom options combinations

Before using Image Switcher for Custom Options, you need to make sure you have the images you'll be using when switching between the options uploaded. You can upload images for custom options combinations using default Magento functionality.

Go to **Catalog**→**Manage Products**→<Product Name>→**Images**. (NOTE: If there is no need to show any images on the product gallery, just check "Exclude" checkbox):

	<input type="text"/>	<input type="text" value="10"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	<input type="text"/>	<input type="text" value="10"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Creating Custom Options Combinations

Once your custom options and images are set, you can match image with custom option combinations by going to **Catalog**→**Manage Products**→<Product Name>→**Custom Options Image Combinations** as shown on the screenshot below.

(NOTE: Save all the product changes before option combinations creation. Do not forget to save the product after all combinations are created).
