

Magento Promotion Tag Countdown Installation Guide

Promotion Tag Countdown

Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.
2. On your back end, go to **System** → **Magento Connect** → **Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under “Direct package file upload” section, browse for package file and hit “Upload”.

The screenshot shows the Magento Connect Manager interface. At the top, there is a header with the logo and the text 'MANAGER'. Below the header, there are tabs for 'Extensions' and 'Settings', and links for 'Return to Admin' and 'Log Out'. The main content area is divided into sections: 'Settings' with a checkbox for 'Put store on the maintenance mode while installing/upgrading/backup creation' and a dropdown for 'Create Backup' set to 'Database'; 'Install New Extensions' with a search box and an 'Install' button; and 'Direct package file upload' which is highlighted with a red box. This section contains a 'Browse...' button and an 'Upload' button, with red arrows pointing to them. Below this, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button and a 'Commit Changes' button. At the bottom, there is a 'Channel: Magento Community Edition' and a checkbox for 'Clear all sessions after successful install or upgrade:'. The 'Direct package file upload' section is highlighted with a red border.

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Cache Management**.
6. Congratulations! You are now ready to use Promotion Countdown extension.

Configuration/Usage

1. Go to **System** → **Configuration** → **Orange35** → **Promotion Tag Countdown** and enable the module.
2. Set the Start/End Date, and if needed, days of the week as well as Start/End Time for when to show the tag within each day of the promotion campaign.
3. Apply a certain promotion from the list under **Promotion Applied** field and set values for other options available under extension configuration, as shown on the screenshot below:
