

Magento Quick View Installation Guide

Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.
2. On your back end, go to **System** → **Magento Connect** → **Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under “Direct package file upload” section, browse for package file and hit “Upload”.

The screenshot shows the Magento Connect Manager interface. At the top, there is a dark header with the 'Magentoconnect MANAGER' logo. Below the header, there are tabs for 'Extensions' and 'Settings', and links for 'Return to Admin' and 'Log Out'. The 'Settings' tab is active, showing options to 'Put store on the maintenance mode while installing/upgrading/backup creation' (checked) and 'Create Backup' (unchecked) with a dropdown menu set to 'Database'. Below this is the 'Install New Extensions' section, which includes a search box and an 'Install' button. The 'Direct package file upload' section is highlighted with a red box and contains instructions: '1 Download or build package file.' and '2 Upload package file.' with a 'Browse...' button and an 'Upload' button. At the bottom, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button, and a 'Channel: Magento Community Edition' section with a 'Commit Changes' button. A footer note says 'Clear all sessions after successful install or upgrade:

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Configuration** → **Cache Management**.
6. Congratulations! You are now ready to use Quick View on your site.
