## Wishlist Panel Installation Guide

### Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.
2. On your back end, go to **System** → **Magento Connect** → **Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under “Direct package file upload” section, browse for package file and hit “Upload”.

The screenshot shows the Magento Connect Manager interface. The top navigation bar includes 'Extensions' and 'Settings' tabs, along with 'Return to Admin' and 'Log Out' links. The 'Settings' section is active, showing options for maintenance mode and backup creation. Below this is the 'Install New Extensions' section with a search field and an 'Install' button. The 'Direct package file upload' section is highlighted with a red box and contains a 'Browse...' button and an 'Upload' button, with red arrows pointing to each. The bottom of the interface shows 'Manage Existing Extensions' with a 'Check for Upgrades' button, the channel 'Magento Community Edition', and a 'Commit Changes' button. A checkbox for 'Clear all sessions after successful install or upgrade' is also visible.

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Cache Management**.
6. If you have a robots.txt file, please add this code after the installation: Disallow: /wishlistpanel/
7. Congratulations! You are now ready to use Wishlist Panel widget.
