

Magento Color Picker With Zoom Installation/Configuration Guide

Installation

1. Back up your store database and web directory.
2. Go to **System** → **Magento Connect** → **Magento Connect Manager** in the admin panel. Log in to Magento Connect Manager with administrator credentials.
3. On Magento connect Manager section under “Direct package file upload”, browse for archive file and hit “Upload”.

The screenshot shows the Magento Connect Manager interface. At the top, there is a header with the logo 'Magentoconnect MANAGER'. Below the header, there are tabs for 'Extensions' and 'Settings', and links for 'Return to Admin' and 'Log Out'. The main content area is divided into sections: 'Settings' with checkboxes for maintenance mode and backup creation; 'Install New Extensions' with a search field and an 'Install' button; and 'Direct package file upload' which is highlighted with a red box. This section contains a 'Browse...' button and an 'Upload' button, with red arrows pointing to them. Below this, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button and a 'Commit Changes' button. At the bottom, it shows 'Channel: Magento Community Edition' and a checkbox for 'Clear all sessions after successful install or upgrade:'. The 'Direct package file upload' section is the focus of the instruction in step 3.

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Configuration** → **Cache Management**
6. Congratulations! You are now ready to use Color Picker extension.

Color Picker Configuration

1. Module global configuration options are located under **System** → **Configuration** → **Orange35** → **Color Picker Options**.

The screenshot displays the Magento configuration interface. On the left is a navigation menu with categories: Configuration, ORANGE35, CATALOG, and CUSTOMERS. Under ORANGE35, 'Color Picker Options' is selected. The main content area is titled 'Color Picker Options' and shows settings for 'Product View'. The settings are as follows:

Setting	Value	Help	Scope
Swatch Width	30	Set the width of the color box for each option inside product page	[STORE VIEW]
Swatch Height	30	Set the height of the color box for each option inside product page	[STORE VIEW]
Show Slider	Yes	Select if you want to enable slider for options on product page	[STORE VIEW]
Options Per Slider Page	8	Set how many boxes you would like to see on slider page	[STORE VIEW]
Show Default Attribute Input	No	Select if you want to see default magento select apart with color swatches	[STORE VIEW]
Popup Info Box	Yes	Select if you want to enable info box on mouse hover	[STORE VIEW]
Popup Info Width	200	Set the width of the popup info box for each option inside product page	[STORE VIEW]
Popup Info Height	200	Set the height of the popup info box for each option inside product page	[STORE VIEW]

2. After making the changes to Width/Height fields, make sure to press **Flush Images Cache!** button so the system generates new thumbnails with appropriate sizes and then hit **Save Config** button.
3. Options Setup is located under **Catalog** → **Attributes** → **Manage Attributes**. Select the attribute you want to use via Color Picker and go to **Color Options** tab. The color option will be only used if there is no image option uploaded.

Enable Image Zoom [STORE VIEW]

Zoom Popup Width [STORE VIEW]
▲ default value: '300' px

Zoom Popup Height [STORE VIEW]
▲ default value: '300' px

- After adjusting Zoom Width/Height fields hit **Save Config** button to save the changes.

Uninstallation

- Go to **System** → **Magento Connect** → **Magento Connect Manager** in the admin panel. Log in to Magento Connect Manager with administrator credentials.
- On Magento connect Manager section under “Manage Existing Extensions” find the extension you want to delete. Select the “Uninstall” action in the dropdown and click “Commit Changes”
- Execute the following MySQL script in your MySQL manager:

```
DELETE FROM core_resource WHERE core_resource .code = 'orange35_colorpicker_setup';
DROP TABLE orange35_colorpicker_eav_attribute , orange35_colorpicker_eav_attribute_option ;
```

Resolving common issues

1. If switching between the attribute options doesn't change the main product image on the product view page, make sure your issue isn't caused by any of the following reasons:
 - 1.1. The products associated with attribute options of the product you're viewing have no images selected on the back end. To add an image to an associated product proceed with the following steps:
 - Go to **Catalog** → **Manage Products** → Hit **Edit** on the product you need.
 - Choose **Associated Products** tab in the left-hand navigation menu and choose one of the associated products to edit from the list down below the paget.
 - In the opened window, hit **Images** tab in the left-hand navigation menu, upload an image and make sure it has all the radio buttons marked correctly and hit **Save** button afterwards.
 - 1.2. You have main image zooming tool, image gallery or any other outside module functioning on the product detail page that overrides image identifiers of the Magento default template used by our extension to switch the images (which is not a good practice). To check if that's the case try disabling modules like that and see if that resolves the issue.
 - 1.3. You're using a custom theme on your website that overrides image identifiers of the Magento default template used by our extension to switch the images. To check if that's the case try switching to a default Magento website theme and see if that resolves the issue or if you're technically skilled, check if the main product image has the id="image" indicated, cause if it doesn't the described reason is true.

If none of the items above are your case or if they are, however you require additional assistance to resolve them, contact our support team at support@orange35.com and we'll do our best to help you out.

2. If after installing extension, you see a '**404 not found**' message under **System** → **Configuration**, make sure to log out of the website back end and then log in again and see if that resolves the issue.

Feel free to contact us at support@orange35.com in case of any questions or concerns regarding Color Picker with Zoom extension at any time and we'll get back to you as soon as possible. We greatly appreciate your feedback and will gladly assist you through your experience with our product!
